

## 6 - ORIGINS AND FUTURE DEVELOPMENTS

The work of the Star Group finds its initial point of inspiration in the words of the Tibetan Master about the Law of Group progress. This law – the Master writes - is destined to become a reference for the groups of the future. It "will take place automatically as the group identity and integration becomes the dominant thought in the group consciousness, and the desire for personal growth and spiritual satisfaction is relegated to a secondary place. This contemplated group unity will have its roots in group meditation, or in the contemplative life (in which the soul knows itself to be one with all souls)."

And it goes on: "Each person will be regarded as a transmitter of the type of energy which is the predominant energy in any ray type, either egoic or personality rays. Each can in time learn to transmit the quality of his soul ray to the group, stimulating his brothers to greater courage, clearer vision, finer purity of motive, and deeper love, and yet avoid the danger of vitalising his personality characteristics. This is the major difficulty. To do this effectively and correctly, we must all learn to think of each other as souls, and not as human beings. " (\*)

For many decades the vast network of Goodwill triangles has been active in the world, a subtle construction based on the daily connection of a triangle of souls that serve through the repetition of the Great Invocation. The work in the star group can be considered as a further development, more specific and even more complex than the very important initiative of internal linking in the triangles. Ultimately, the six-pointed star is formed by two interconnected triangles, one in ascending position and one descending, to effectively represent Spirit lowered into matter and matter striving toward Spirit.

Another theoretical point of reference for the work of the star is the seven Goals of the Plan, formulated by the Tibetan Master at various points of his writings.

They represent the realistically achievable goals of humanity's consciousness in the next age of Aquarius. Each Ray corresponds to a Goal to be supported and nourished, according to the following table:

- 1st Ray: Restoration of the Mysteries
- 2nd Ray: Return of Christ
- 3rd Ray: Group Initiation
- 4th Ray: Imitation of the Hierarchy
- 5th Ray: New Culture and New Civilization
- 6th Ray: New World Religion
- 7th Ray: New World Order

Therefore, every person who participates in the life of a star with their own precise Ray function, will keep in both their mind and heart these planetary Goals, while they carry out their simple task of daily alignment.

Future developments can be described visually from an image: an initial star, with seven members, one at each vertex, joins with six other stars, each with its own members, to form a star order with 49 vertices. These first seven stars form a first constellation. In turn, this constellation can be combined with six other constellations, and so on, increasingly expanding the network and power of the star system, whose geometry activates resonances and therefore perfect communication is created inside it.

This image shows us how star work and the establishment of star Orders is a process destined to expansion; in this way, an ordered network of points of light is being formed. This network is composed of consciousnesses aware of one's position and function towards the evolution of the Planet, at the disposal of, and as an instrument for, the Work of impression by the Spiritual Hierarchy. What will expand and consolidate, will be a group of spiritual brothers and sisters united by a common purpose, and rightly positioned according to the higher laws of a new art-science that we can define as psycho-geometry. This art-science will teach us increasingly how to cooperate with the Universal Laws, with the Cycles of Celestial Luminaries and with the Seven Rays, which then become the Seven Qualities of Space and the Seven Directions of Evolution.

The subtle work of the members will make them more and more aware that their cooperation, with all that it implies, signals the acceptance of being part of a prepared Plan and of being able to commit to serve it and to realize its aims.

How then can we foster the evolution of the Planet, of humanity and of all kingdoms, as members of the new group of world servers aware of the existence of a Plan?

1. Through increasing understanding of the need to find, in all situations in life, a sense of sacredness. This will bring us ever closer to the "Mysteries", containing the burning flame of the Divine Purpose, which day by day is revealed before us. Holding it firmly in consciousness and through progressive integration and synthesis, we can contribute to the Goal of the Plan which is the "*Restoration of the Mysteries*".

2. Through educating ourselves to recognize the centrality of a guiding principle, within us and outside ourselves. This will teach us to love the Purpose of evolution itself, generating the field of nourishment of all potentialities. In this way, we will contribute to create in human beings, the 'space' which will support the "*Return of the Christ*", or the rebirth in the consciousness of humanity of the Christ Consciousness: that state which will be capable of connecting all forms into a single reality.

3. Learning to cooperate in an increasing and aware way, thus approaching the path toward "*Group Initiation*"; a state of group consciousness beyond a physical place or a specific group of people. This will generate a network of centres in harmony with each other, capable of giving life to a Culture of Light and Creative Thought, as a direct precipitation of the World of Ideas and the Divine Plan on Earth.

4. Keeping in the mind and heart our reference model, the Spiritual Hierarchy, so that the embodied life becomes an "imitation of the Hierarchy". We can constantly look for Beauty, Good and Truth and their harmonious application to group relations, and among groups, for the creation of new social models. While holding a continuous exchange with the elevated planes of existence, we will work as the "hands" and "feet" of the higher Entities that hold in Their Heart the planetary evolution.

5. Anchoring in the mental plane of the Planet the idea of a "*New Culture and Civilization*" as a result of the rediscovered Essential Divinity on the part of humanity, produced by the union of head and heart. Manifesting luminous social models in which all cooperate creatively, guided by a scientific view of life. Expressive freedom, good will, capacity for collaboration and a sense of unity in diversity will be the cornerstones of this New Civilization.

6. Cultivating in everything the principle of essential and immanent divinity: this will help us to create the base of a new inner religiosity founded on unifying values. This will lead towards a "*New World Religion*", not as a set of dogmas but as a union with the Divine, expressed by reproducing in earth what happens in heaven.

7. Laying the foundations – through thoughts, words and actions - of a "*New World Order*" based on the recognition of an internal order, the fruit of the union between Spirit and matter. This will be expressed in everyday life through Beauty irradiated through every form, in the right times and rhythms. A higher order of Nature will be affirmed in human and planetary life.

The work of serving the Plan through the Seven Goals which characterize it, will be fundamentally carried out on the plane of consciousness: a creative meditation work in the broadest sense of the term, which will produce those ideas, formulas and forms capable of conditioning and guiding humanity towards the fulfilment of its highest potentialities. The service rendered to the Seven Goals will give birth to those positive influences that will increasingly characterize human and planetary life in seven main fields of expression: Politics, Education, Economics, Art, Science, Religion, Social Organization.

It is beautiful to think of our planet Earth "covered with stars" that pass through it and traverse it in all directions. It is a way to unite Earth and sky, merging the notes of these two worlds.

And it is wonderful to think of us, human beings, as officials engaged in keeping a light alight, while in the process of daily occupations
